

1950s

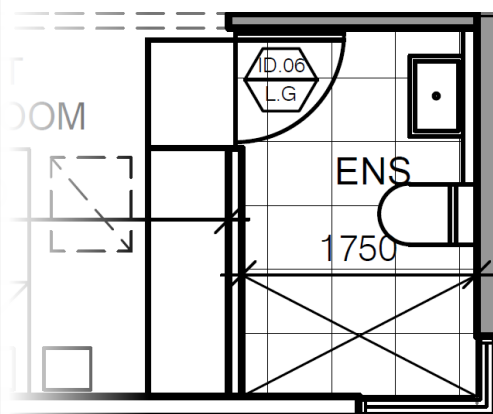

RECAP

This week, Jimmy and Tam crafted a perfectly complementing ensuite to last week's winning guest bedroom. Using a similar colour palette reminiscent of the 50's, they created a space that interprets the era in a contemporary way.

SPOTLIGHT ON TREND

Terrazzo tiling was huge in custom homes built in the 50s, as was glossy pastel tiling in aqua or even pink! The attention to details made this room a winner, with just enough touches of metallics and earthy wood-tones.

Guest Ensuite Renovation Checklist
